

# Roseline Dangazela

## Entry Level Full Stack / AWS Developer

South Africa | Remote

roseline.danga@gmail.com | GitHub: <https://github.com/RoselineDC> | LinkedIn: <https://www.linkedin.com/in/roseline-dangazela-95b718324/>

## PROFESSIONAL SUMMARY

Entry-level Full Stack Developer with hands-on experience in web development, data management, and automation using **Python, MySQL, and JavaScript**. Skilled in master data management, data cleansing, and reporting using **Excel and Tableau**. Experienced in building scalable, maintainable web applications with React, Next.js, and Node.js. Strong analytical, problem-solving, and collaboration skills for remote team environments.

## TECHNICAL SKILLS

- **Programming & Scripting:** Python, JavaScript, TypeScript, Node.js
- **Database & Data Management:** MySQL, MongoDB, Firebase, master data handling, data cleansing
- **Web Development:** React, Next.js, HTML, CSS (SCSS), responsive design
- **Data Visualization & Reporting:** Excel, Tableau, dashboards, reporting pipelines
- **Version Control & Collaboration:** Git, GitHub, Agile workflows
- **Cloud & Tools:** AWS fundamentals, Vercel, API integration

## PROFESSIONAL EXPERIENCE

### Junior Web Developer — Freelance / Projects

2023 – Present | Remote

- Developed full-stack web applications using **React, Next.js, TypeScript, and Python**, building reusable components and dynamic UIs.
- Managed master data and ensured data integrity in **MySQL** databases for reporting and operational workflows.
- Created dashboards and reports using **Excel and Tableau** to provide actionable insights for stakeholders.
- Automated workflows and data pipelines to support scalable remote operations and reporting tasks.

### Procurement Administrator — Hinc Group Pty Ltd

April 2024 – Current | Pretoria, South Africa

- Built automated tender scraping and bid management tools using Python, improving sourcing efficiency by 50%.
- Analyzed and normalized supplier data to ensure data accuracy and integrity, reducing procurement costs by 15%.
- Maintained digital records and databases, ensuring compliance with audit standards and reporting requirements.

## PROJECTS

### Automated Tender Scraper

- Full-stack Python and Next.js application for scraping tenders, filtering data, and notifying users via email.
- Integrated MySQL/SQLite databases for structured data storage and reporting pipelines.
- Implemented automation using cron jobs and Bash scripts for daily updates.

### Content-Driven Web Platform (Sanity + Next.js)

- Connected dynamic content from Sanity CMS to React components for responsive, user-friendly web pages.
  - Ensured accessibility compliance and optimized cross-browser performance.
- 

## EDUCATION

### Bachelor of Computer Science

University of the People, California | 2022 – Present

---

## CERTIFICATIONS & TRAINING

- Software Engineering Bootcamp — ALX Africa (2022–2024)
  - Developer & Technology Apprenticeship — Accenture (Forage)
  - Software Engineering Virtual Experience — Skyscanner (Forage)
- 

## ADDITIONAL HIGHLIGHTS

- Hands-on experience managing master data, data cleansing, and maintaining integrity for reporting purposes.
- Skilled in building dashboards and reports to support business insights using Excel and Tableau.
- Experience with AWS fundamentals, cloud deployment, and automation of data workflows.
- Strong problem-solving, analytical thinking, and quick learning for new technologies.
